

Medical Physics

Volume 32, Number 12, December 2005

POINT/COUNTERPOINT

Methods for image segmentation should be standardized and calibrated

Edward Chaney, Geoffrey Ibbott, and William R. Hendee, Moderator 3507

RADIATION THERAPY PHYSICS

Benchmarking analytical calculations of proton doses in heterogeneous matter

George Ciangaru, Jerimy C. Polf, Martin Bues, and Alfred R. Smith 3511

Target volume dose considerations in proton beam treatment planning for lung tumors

Martijn Engelsman and Hanne M. Kooy 3549

Correction of pixel sensitivity variation and off-axis response for amorphous silicon EPID dosimetry

Peter B. Greer 3558

Monte Carlo simulation estimates of neutron doses to critical organs of a patient undergoing 18 MV x-ray LINAC-based radiotherapy

R. Barquero, T. M. Edwards, M. P. Iñiguez, and H. R. Vega-Carrillo 3579

Determination of penumbral widths from ion chamber measurements

D. Herrup, J. Chu, H. Cheung, and M. Pankuch 3636

Gated CT imaging using a free-breathing respiration signal from flow-volume spirometry

Warren D. D'Souza, Young Kwok, Chad Deyoung, Nicholas Zacharopoulos, Mark Pepelea, Paul Klahr, and Cedric X. Yu 3641

Radiation dose reduction in four-dimensional computed tomography

T. Li, E. Schreibmann, B. Thorndyke, G. Tillman, A. Boyer, A. Koong, K. Goodman, and L. Xing 3650

(Continued)

Subscription Prices (2005)	U.S.A. Poss.	Can., Mex., and Central and So. Amer.	Europe, Asia, Africa, and Oceania [†]
AAPM members	On Membership		
Members of IOMP, AIP, and Affiliated Societies	\$300	\$350	\$370
All others	\$950	\$1000	\$1020

[†]Includes air freight service.

Back-Number Prices. 2005 Single copies \$90. Prior to 2005 single copies \$135.

Medical Physics (ISSN: 0094-2405) is published monthly by the AAPM through the American Institute of Physics. 2005 subscription rates are: US \$950. POSTMASTER: Send address changes to *Medical Physics*, AIP, Suite 1N01, 2 Huntington Quadrangle, Melville, NY 11747-4502. Periodicals postage paid at Huntington Station, NY and additional mailing offices. Membership in the American Association of Physicists in Medicine includes \$40.00 from membership dues to be applied towards a subscription to *Medical Physics*.

Subscriptions, renewals, and address changes should be addressed to *AIP Circulation and Fulfillment Division (CFD)*, Suite 1N01, 2 Huntington Quadrangle, Melville, NY 11747-4502. Allow at least six weeks advance notice. For address changes please send both old and new addresses and, if possible, include a mailing label from the wrapper of a recent issue.

Digital Object Identifier (DOI): Each archival article published is assigned a unique DOI that serves to identify the article in a digital environment. In print, the DOI appears at the end of each abstract.

Document Delivery: Copies of journal articles can be ordered for online delivery from DocumentStore, AIP's online document delivery service (<http://www.documentstore.org/>).

Advertising rates will be supplied on request. Orders, advertising copy, and offset negatives should be sent to the AIP Manager of Exhibits and Advertising, Richard Kobel.

Copyright © 2005. American Association of Physicists in Medicine. All rights reserved.

Copying: Single copies of individual articles may be made for private use or research. Authorization is given (as indicated by the Item Fee Code for this publication) to copy articles beyond the use permitted by Sections 107 and 108 of the U.S. Copyright Law, provided the copying fee of \$22.50 per copy per article is paid to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923, USA. Persons desiring to photocopy materials for classroom use should contact the CCC Academic Permissions Service. The Item Fee Code for this publication is 0094-2405/2005 \$22.50.

Authorization does not extend to systematic or multiple reproduction, to copying for promotional purposes, to electronic storage or distribution, or to republication in any form. In all such cases, specific written permission from AIP must be obtained.

Permission for Other Use: Permission is granted to quote from the *Journal* with the customary acknowledgment of the source. To reprint a figure, table, or other excerpt requires the consent of one of the authors and notification to AIP.

Requests for Permission: Address requests to Penny Slattery, Journal Manager, *Medical Physics Journal*, AAPM, One Physics Ellipse, College Park, MD 20740-3846; Fax: 301-209-3399; Telephone: 301-209-3352; E-mail: penny@aapm.org.

Microform: *Medical Physics* is available on microfiche issued at the same frequency as the printed journal, and annually on microfilm. Direct requests to AIP, Circulation & Fulfillment/Single Copy Sales, Suite 1N01, 2 Huntington Quadrangle, Melville, NY 11747-4502; Fax 516-349-9704; Telephone: 800-344-6902 (U.S. and Canada) or 516-576-2270.

Online Availability: *Medical Physics* is available online at <http://www.medphys.org>. Abstracts of journal articles published by the AIP and Member Societies (and several other physics publishers) are available from AIP's SPIN Web Service (<http://ojps.aip.org/spinweb/>).

Optimization of radiotherapy dose-time fractionation with consideration of tumor specific biology Yong Yang and Lei Xing	3666
A novel method for automatic detection of patient out-of-plane rotation by comparing a single portal image to a reference image Keyvan Jabbari and Stephen Pistorius	3678
MCPI®: A sub-minute Monte Carlo dose calculation engine for prostate implants Omar Chibani and Jeffrey F. Williamson	3688
An international dosimetry exchange for boron neutron capture therapy, Part I: Absorbed dose measurements P. J. Binns, K. J. Riley, O. K. Harling, W. S. Kiger III, P. M. Munck af Rosenschöld, V. Giusti, J. Capala, K. Sköld, I. Auterinen, T. Serén, P. Kotiluoto, J. Uusi-Simola, M. Marek, L. Viererbl, and F. Spurny	3729
Dosimetric characteristics of a new unshielded silicon diode and its application in clinical photon and electron beams Irmgard Griessbach, Markus Lapp, Jörg Bohsung, Günther Gademann, and Dietrich Harder	3750
Preliminary study on the use of nonrigid registration for thoraco-abdominal radiosurgery J. Stancanello, E. Berna, C. Cavedon, P. Francescon, D. Loecx, P. Cerveri, G. Ferrigno, and G. Baselli	3777
Feasibility of four-dimensional conformal planning for robotic radiosurgery A. Schlaefer, J. Fisseler, S. Dieterich, H. Shiomi, K. Cleary, and A. Schweikard	3786
Patient specific treatment verifications for helical tomotherapy treatment plans S. D. Thomas, M. Mackenzie, G. C. Field, A. M. Syme, and B. G. Fallone	3793
On using an adaptive neural network to predict lung tumor motion during respiration for radiotherapy applications Marcus Isaksson, Joakim Jalden, and Martin J. Murphy	3801
Magnetic confinement of electron and photon radiotherapy dose: A Monte Carlo simulation with a nonuniform longitudinal magnetic field Yu Chen, Alex F. Bielajew, Dale W. Litzenberg, Jean M. Moran, and Frederick D. Becchetti	3810
A dosimetric comparison of ¹⁶⁹Yb versus ¹⁹²Ir for HDR prostate brachytherapy G. Lymperopoulou, P. Papagiannis, L. Sakelliou, N. Milickovic, S. Giannouli, and D. Baltas	3832
Microdosimetric evaluation of the 400 MeV/nucleon carbon beam at HIMAC Satoru Endo, Kenichi Tanaka, Masayori Ishikawa, Masaharu Hoshi, Yoshihiko Onizuka, Masashi Takada, Hiroshi Yamaguchi, Naofumi Hayabuchi, Naoko Maeda, and Kiyoshi Shizuma	3843
2-Step IMAT and 2-Step IMRT in three dimensions Klaus Bratengeier	3849

RADIATION IMAGING PHYSICS

Expandable and rigid endorectal coils for prostate MRI: Impact on prostate distortion and rigid image registration Yongbok Kim, I-Chow J. Hsu, Jean Pouliot, Susan Moyher Noworolski, Daniel B. Vigneron, and John Kurhanewicz	3569
The physics of computed radiography: Measurements of pulse height spectra of photostimulable phosphor screens using prompt luminescence Kristina N. Watt, Kuo Yan, Giovanni DeCrescenzo, and J. A. Rowlands	3589
Reduction of false positives by internal features for polyp detection in CT-based virtual colonoscopy Zigang Wang, Zhengrong Liang, Lihong Li, Xiang Li, Bin Li, Joseph Anderson, and Donald Harrington	3602
The effects of the imaging system on the validity limits of the ray-optical approach to phase contrast imaging A. Peterzol, A. Olivo, L. Rigon, S. Pani, and D. Dreossi	3617
Fractal characterization of brain lesions in CT images Rajnish K. Jauhari, Rashmi Trivedi, Prabhat Munshi, and Kamal Sahni	3661
An improved analytical model for CT dose simulation with a new look at the theory of CT dose Robert L. Dixon, Michael T. Munley, and Ersin Bayram	3712

(Continued)

2D-3D registration of coronary angiograms for cardiac procedure planning and guidance Guy-Anne Turgeon, Glen Lehmann, Gerard Guiraudon, Maria Drangova, David Holdsworth, and Terry Peters	3737
Contrast cancellation technique applied to digital x-ray imaging using silicon strip detectors C. Avila, J. Lopez, J. C. Sanabria, G. Baldazzi, D. Bollini, M. Gombia, A. E. Cabal, C. Ceballos, A. Diaz Garcia, M. Gambaccini, A. Taibi, A. Sarnelli, A. Tuffanelli, P. Giubellino, A. Marzari-Chiesa, F. Prino, E. Tomassi, P. Grybos, M. Idzik, K. Swientek, P. Wiacek, L. M. Montaño, L. Ramello, and M. Sitta	3755
Technique factors and their relationship to radiation dose in pendant geometry breast CT John M. Boone, Alexander L. C. Kwan, J. Anthony Seibert, Nikula Shah, Karen K. Lindfors, and Thomas R. Nelson	3767

RADIATION PROTECTION PHYSICS

The UF series of tomographic computational phantoms of pediatric patients Choonik Lee, Jonathan L. Williams, Choonsik Lee, and Wesley E. Bolch	3537
Important changes in medical x-ray imaging facility shielding design methodology. A brief summary of recommendations in NCRP Report No. 147 Benjamin R. Archer and Joel E. Gray	3599

NON-IONIZING RADIATION PHYSICS

Optimized interstitial PDT prostate treatment planning with the Cimmino feasibility algorithm Martin D. Altschuler, Timothy C. Zhu, Jun Li, and Stephen M. Hahn	3524
---	-------------

NUCLEAR MEDICINE PHYSICS

Calculation and validation of the use of effective attenuation coefficient for attenuation correction in In-111 SPECT Youngho Seo, Kenneth H. Wong, and Bruce H. Hasegawa	3628
---	-------------

ULTRASOUND PHYSICS

High-speed photography during ultrasound illustrates potential therapeutic applications of microbubbles Michiel Postema, Annemieke van Wamel, Folkert J. ten Cate, and Nico de Jong	3707
---	-------------

THERMOTHERAPY PHYSICS

A global bioheat model with self-tuning optimal regulation of body temperature using Hebbian feedback covariance learning M. L. Ong and E. Y. K. Ng	3819
---	-------------

ANATOMY AND PHYSIOLOGY

Liver segmentation for CT images using GVF snake Fan Liu, Binsheng Zhao, Peter K. Kijewski, Liang Wang, and Lawrence H. Schwartz	3699
--	-------------

LETTERS TO THE EDITOR

¹⁹⁸Au seeds Warren K. Sinclair	3862
Response L. S. Dauffy, L. A. Braby, and B. M. Berner	3863

INSTRUCTIONS TO AUTHORS 3921

Cover figure: Representative axial MR images taken from the midglad of two patients acquired with (a) and without (b) the expandable endorectal coil (ERC) and with (c) and without (d) the rigid ERC, respectively. The right-to-left (R/L) distance is 4.50, 3.99, 4.07 and 4.19 cm for (a), (b), (c) and (d), respectively. The anterior-to-posterior (A/P) distance is 2.84, 3.07, 2.51 and 2.56 cm for (a), (b), (c) and (d), respectively. [Figure 3 from Kim *et al.* (p. 3575)].

Only when space allows will the list of Currently Available AAPM Publications and the Instructions to Authors appear in the printed version of *Medical Physics*. Effective immediately, the Ph.D. abstracts will only be available electronically, and should be submitted as a Word attachment to journal@aapm.org

The Ph.D. abstracts, list of publications, and Instructions to Authors are available anytime from the Medical Physics website at

<http://www.medphys.org>
